EKF-SLAM

With ITER + visual markers

Grupo 4

Diogo Oliveira, Luís Simões, Mariana Martins, Miguel Paulino

Aruco detection

ID = 8
Angle = 49.85°
Distance = 1.17m

ID = 6
Angle = 9.74°
Distance = 0.47m

ID = 1
Angle = 66.46°
Distance = 3.39m

Problems

So, we took the ground truth and

Future work

Regarding the EKF-SLAM Algorithm:

- Take advantage of the matrices being Sparse
- Implement the Matching Step
